

The Frances & Herbert Brody Pre-School of Temple B'nai Or offers children the opportunity to explore and grow through enrichment.

We are providing programs that reach children on multiple levels, using a variety of teaching styles, and expanding their knowledge through experiential learning.

Join the journey and see the rewards as your child(ren) expand their horizons.

Take the leap to a lifetime of loving to learn.

"The world's greatest resource is the mind of its children" ...Walt Disney

Monday 1:00 – 2:30

SUPER DUPER SCIENCE

Grab your magnifying glass, and follow the trail to science fun. Chemistry experiments, archaeological digs, museum presentations, nature studies – these are just a few of the exciting explorations we will embark on in each class. We will not only think like scientists, we will be the scientists. Quenching your child's thirst for knowledge, and satisfying their continuous curiosity, learning will be the added benefit to all the fun we will have.

TUESDAY 1:00 – 2:30

SPORT SQUIRTS

This program has been designed to introduce young children to a variety of sports in a safe, structured environment. All games and activities encompass hand/eye coordination, balance, agility and movement – all key factors to the early development of children in sport.

In addition to having a great time playing different sports, children will develop social interaction and communication skills. All sports are developed through a series of games and activities designed to ensure learning, enthusiasm, and fun.

Wednesday 1:00 - 2:30

HAPPY & HEALTHY:

Mind, Body & Soul

Take out your gardening gloves, chef's hat and yoga mat for an introduction to wellness. We will explore taking care of our earth through tending our own garden, experience healthy eating by cooking delicious, nutritious food, and care for our bodies through yoga exercises. Each week we will gain an understanding of the harmony between the world and ourselves. Food allergies will be monitored.

THURSDAY 1:00 – 2:30

Masters of All Medium

(New Content)

Beyond the masterpieces your child creates in the regular school day, we will foster your child's creativity by introducing them to the medium of the masters. We will provide a hands-on exploration of photography, watercolors, sculpture, collage, architecture, fashion, and other forms of artistic expression. Each topic will produce a finished piece of artwork, in addition to some basic art history knowledge. You may find your child questioning why you have a post-modern piece of artwork in your colonial style home. Did we mention that it's fun too?

FRIDAY – 1:00 – 2:30

GECKO KIDS COMPUTERS

Although Pre-School computer experiences need to be fun and engaging, teaching children basic computer knowledge is now a life skill. Through our program children are exposed to important terminology, their fine motor skills are challenged in different and fun ways, and they learn computer graphics while developing creativity through each weekly lesson. The children acquire or reinforce letter recognition, sentence and story structure, and keyboarding skills. Through the experience of saving their files, the children are exposed to short cuts, folder organization and file extensions. Most importantly, the children have a blast while accumulating key knowledge and create keepsake books of their journey.

Each child is provided with their own laptop during class, and provided with individualized instruction depending upon their age and ability. This is no ordinary computer enrichment!

*Please note there is a different price for this enrichment class. Please refer to the registration form.
